PROJECTS

Momochi UI/UX Mobile Redesign Project (Self-led project)

08.2024-Present

- Objective: Redesign Momochi's website to enhance user experience, specifically focusing on improving the online ordering process to increase mobile engagement.
- Research: Conducted user interviews to identify key pain points. Found that 100% of users interested in ordering online but faced challenges due to missing features like ordering system and checkout.
- Design Process: Developed wireframes with intuitive layouts and interactive prototypes to visualize the new ordering process, based on research insights.
- Results: Increased user engagement, enhanced user experience and potentially boost business growth.

Kid's Toys E-commerce UI/UX Design Project (Self-led project)

06.2024-07.2024

I designed and developed a user-friendly online store using WordPress and WooCommerce. With a focus on bright colors, clear layout, and intuitive navigation, I created a fully functional website that's ready for customers to use with their own products.

Digital Advent Calendar Builder Design and Development Project (Team project)

03.2024-05.2024

I contributed as both UI/UX designer and partial full-stack developer, building a customizable digital calendar with HTML, CSS, React and Firebase. The tool enables users to create personalized calendars, blending functionality with a delightful user experience.

PROFESSIONAL EXPERIENCE

Beauty Advisor / La Prairie at Helsinki-Vantaa Airport

Mar 2018 - Aug 2023

- During seasonal campaigns, boosted user engagement by 30%, approached 800+ customers, and successfully converted 10 daily interactions into loyal clients by active listening and empathy-driven service.
- Achieved a continuous 32% sales increase over 4 months in 2019 through effective communication, storytelling and strong collaboration across functional teams.
